

“COEXISTING WITH WOLVES!”

Presented by Langley Field Naturalists

DATE: THURSDAY, NOVEMBER 18th 2021

TIME: 7:30 pm – Everyone Welcome! please email stewardship@leps.bc.ca to join.

BY: Adam T. Ford, Assistant Professor, Canada Research Chair - Wildlife Restoration Ecology, UBC Okanagan - from UBC Okanagan.

Come and listen to Dr. Adam Ford, professor at UBCO, tell us about the research on wolves with his students at the Wildlife Restoration Ecology lab to better understand them and their behaviors! Researchers are using audio technology to bring the B.C. wolf, an elusive and often misunderstood creature, into the spotlight. The team has been using audio devices to track them by monitoring their howls in the East Kootenays.
